Commenting and Answering Posts

These pieces of content are termed user content and are subject to the Terms and Conditions governing user generate content.

Each page of content has the ability to be commented on, or answered.

On the bottom of each question, answer and video, the logged in user can enter a comment into a form with a title. When this is submitted, the text will appear on the page.

The user who has posted the query can edit this post at any point but they cannot edit anyone else's.

If a user hits reply to a comment or answer, their reply is going to be posted underneath the comment rather than the original piece of content. This is because that reply is seen as linked to the comment rather than anything else.
