

# TERENA Networking Conference: TNC2013

## Group:

### First Call for Papers for 2013 TERENA Networking Conference

The Programme Committee for the 2013 TERENA Networking Conference (TNC2013) has issued a Call for Papers exploring the theme 'Innovating Together'. The deadline for submission of papers is 30 November 2012.

TNC2013 will be held in Maastricht, Netherlands, from 3 to 6 June 2013, hosted by SURFnet, the Dutch research and education networking organisation.

### Innovating Together

Networks continue to grow in importance, creating opportunities in all aspects of today's society, impacting science and the arts as well as health, education and government. With this come evolution and sophistication of the network technologies, the applications, the service providers and the user communities. Conference papers on all subjects relevant to the spirit and objectives of the conference, and the theme 'Innovating Together', should be submitted as extended abstracts of 600 – 1200 words (rather than full papers

More information about the conference topics at TNC2013 - <https://tnc2013.terena.org/web/participate/topics> [1].

### How to submit

Abstracts can be submitted conveniently using federated authentication on the TNC2013 website - <https://tnc2013.terena.org/> [2].

More information about federated login to submit papers is at <https://tnc2013.terena.org/submit> [3].

All authors are required to follow guidelines in the preparation of their submitted papers: <https://tnc2013.terena.org/web/participate/guidelines> [4].

### About the TERENA Networking Conference

The annual TERENA Networking Conference (TNC) is the largest and most prestigious European research networking conference - over 500 participants including decision makers, networking specialists and managers from all major European networking and research organisations, universities, worldwide sister institutions and industry representatives attend.

Through keynote speeches by renowned specialists and many parallel sessions, the Conference presents an overview of the latest developments in research networking, both in the technical field and in the areas of application and management.
