

Appendix 2 - Lifesize Icon 600 - Detailed Video Tests

Note: The LifeSize Icon 600™ system supports H.263+ and H.264 however it is not possible to select the video protocol in calls between LifeSize units. In the detailed video tests below only H.264, the default protocol selection between LifeSize units was tested.

For the following tests the video resolution was:

Connection Speed	Resolution
384 Kbit/s	928 x 528 @ 30
768 Kbit/s	1280 x 720 @ 30
2 Mbit/s	1776 x 1000 @ 60
4 Mbit/s	1920 x 1080 @ 60
6 Mbit/s	1920 x 1080 @ 60

For all the following tests at 384 Kbit/s the corresponding audio standard was G.722.1c and for all connection speeds > 384 Kbit/s was 16KHz AAC-LC.

Objective Video Tests: Signal measurements

1. 75% EBU bars
2. Grey scale

Subjective Video Impairments Tested:
