

## Recording essential information

It is recommended that all organisations maintain a record of information that is essential to running their Janet connection. The [Record of Network Information and Contacts form](#) <sup>[1]</sup> can be used to record information such as IP addresses and domain names. This record will not only be a quick reference source for the member of staff who is responsible for the day-to-day running of the site network, but will also provide vital background information for new or temporary staff.
