Janet Reach

Group:

Janet Reach is a scheme to support industry collaboration with academic and research partners in the use and development of e-Infrastructure resources. It does this through provision of a high-capacity connection to the Janet network for industry partners in projects which have been assessed and accepted within the scheme.

If you are interested in taking advantage of the Janet Reach scheme, further details can be found in the **Guidance for Applicants** [1] document, which sets out the broad expectations and criteria which projects would need to satisfy to be successful.

To make an application to the scheme, please request a form and accompanying finance spreadsheets for completion by the project partners. You are strongly recommended to have an informal discussion with one of the scheme specialists prior to making your submission.

For further information, or to request a discussion with a scheme specialist, please send a message including your contact details to janet-reach@ja.net [2].
