

Janet txt

Group:

Jisc procured this secure SMS messaging service under OJEU rules and set up an SMS framework agreement with PageOne.

The service enables you to manage and distribute messages to specific individuals or groups via their mobiles, landlines, email or pagers. The SMS tariff is a simple flat-rate and is competitively priced.

Staff and student data security are very important and Janet txt offers clear and contracted commitments on data security and resilience.

Details about the scope and duration of the framework, how to place an order, etc. can be found in the **Buyers' Guide** ^[1].
