

Connection timeline

Starting the process

Contact [your account manager](#) ^[1] - they will be in touch within five days to confirm eligibility.

Important points to consider:

- Bandwidth usage on your existing connection can be determined using Netsight
- Router requirements and Janet managed router service
- Location for terminating connection on-site
- Is your comms room ready for a survey?
- Different levels of resilience are available. More complex requirements will attract additional costs

Contact the Janet connections group for further information.
