

Wireless Technology Advisory Service

The wireless technology advisory service has now closed [1].

Archive content

Archived versions of the service's content can be found here:

- [Case studies](#) [2]
- [Evaluations](#) [3]
- [FAQs](#) [4]
- [Guides](#) [5]
- [Presentations and external advice](#) [6]
- [Security](#) [7]
- [Standards and protocols](#) [8]
- [Summary of wireless projects in the Janet community - Dec 2010](#) [9]

See the community group for other wireless related documents, case studies, etc [10].

JANET wireless technology discussion e-mail list

The Jiscmail open public mailing list wireless-admin@wireless-admin.ac.uk [11] was set up for the community to discuss wireless issues. Interested parties are invited to join. This continue to run after the closure of the WTAS service.

Service closure

As technologies have improved, the demand for this advisory service has decreased. It is important that we direct resources to those areas that are most needed by our community and so **it has been decided that the service will be closing at the end of March 2015.**

We'd like to thank Loughborough University, especially Matt Cook, Pranay Pancholi and Scott Armitage, for their advice and support over the years.

Over the next couple of months or so, Pranay Pancholi at Loughborough University will provide a few document guides e.g. tips on predictive planning using Ekahau and hints for optimising an existing wireless network. The documents will be added to this site once they're available. Existing documents will remain available on the web site but we won't be responding to new queries after that date.
