

Registering a domain name

To register your domain name ^[1] under ac.uk or gov.uk, if this has not already been done, or to change delegation details.

Janet is responsible for the administration and registration of domain names under the ac.uk and gov.uk domains. We can provide neutral advice to Janet customers on registering and maintaining names in other domains if requested. Nominet ^[2] should be contacted for information on all other domains under .uk, including sch.uk. Janet may assist a customer organisation to register a new domain name other than under ac.uk/gov.uk if required ^[3], but this will be a chargeable service. Janet will not undertake to register domain names administered outside the UK.
