**Cumbria Service Outages - Last 12 Months**

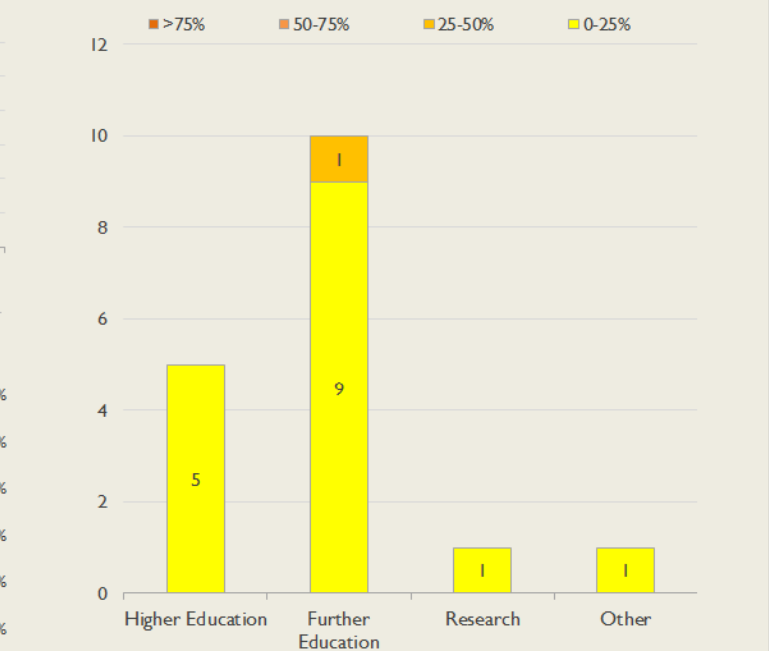

NB: Periods of scheduled and emergency maintenance are not included in reliability performance statistics

**Connection Usage**

Traffic usage is expressed as the sum, in megabits per second, of 90th percentile readings taken during the month, in whichever direction is the greater, for all links being charted

**% Utilisation of Available Contractual Bandwidth at 90th Percentile**

**Cumbria Traffic Against Janet Traffic**

## Service Availability

The SLA target sets a minimum of 99.7% availability for each customer, averaged over a 12 month rolling period

Periods of scheduled and emergency maintenance are discounted when calculating availability of services

Monthly and annual availabilities falling below 99.7% are highlighted

\* Service has resilience - where an organisation retains connectivity during an outage period by means of a second connection, the outage is not counted against its availability figures

**Connection outages for current month**

Maintenance outages are included in this table - only unscheduled maintenance is counted against availability.

Some of the outages reported below are on circuits which are not connected through the selected region - they appear in the table because they are part of a service whose primary connection does belong to this region.
