Hampshire and Isle of Wight (HIOW)Partnership

Ian Wilcox

NHS/N3 Forum 17 Nov 2005

What are we trying to achieve?

- Users view
  - Easy to set up terminal, printer and telephone
  - I shouldn't have to worry about the network
  - I need access to other organisations services
  - I work at another organisation's site
  - Can I use someone else's terminal and printer?
  - Can I use other organisations' wireless points?

Hampshire
County Council

Example of what we are doing

- N3 NHS Community of Interest Network
  - Health network for HIOW led by SHA
  - Will consider Social Services, HE, children in Hospital requirements in the design
  - Potential to extend to non NHS sites
- Standard wireless 'landing page'
- Co-operation on N3 Gateway requirements

Approach

- Standardised/standards based approach
  - seamless (to the user) connection across different networks
- Shared infrastructure
  - Easier to achieve standardisation
  - Reduce costs
- Joint governance
  - Only where necessary
