e-Infrastructure and health research

Bob Day
Chief Technology Officer
Bob.Day@ja.net

janet

- Practical steps in enabling research access to health data?
    - potential Jisc funding for a 1 - 2 year initiative
    - proposal to be formulated – how can we make a difference?
    - Farr Institute: potential targets
        - an AAI for the Institute and its collaborators
        - a "secure network layer" interlinking nodes
    - other concrete work items we should consider?

- UK e-infrastructure and information security?
    - Working Group under auspices of RCUK; implemented by Janet
    - first meeting – usability of existing federated AAI technologies
        - understand actual problems and issues – find practical solutions
        - virtual organisations, the "homeless", identity provision services
        - roadmap for convergence of AAI/AIM services

- Are we doing enough to address <u>IG</u> issues systematically?
