Collaborative Research Environments – a case study from Harrogate & District Foundation Trust

Research at Harrogate & District Foundation Trust

- #1 for number of recruiting studies in Small Acute Trust category
- R&D Unit Medicine for Members events
- Collaboration:
 - Yorkshire & Humber Academic Health Science Network
 - Leeds & York Teaching Hospitals
 - North East Yorkshire & Northern Lincolnshire CLRN
 - Yorkshire Cancer Centre
 - MacMillan Cancer Support
 - International NIH
 - Working with patients

Collaborative Research – Some Requirements

- Document libraries sharing & backing up documents (text, data, images, slides)
- Calendar arranging meetings, flagging events
- Videoconferencing
- Contact details teams and stakeholders
- Tracking progress updates, discussions, plans
- Links to external websites partners, literature, trials
- Security simple logon, access from anywhere
- Example HDFT Acne Priority Setting Partnership

Acne Priority Setting Partnership

- James Lind Alliance prioritising future research
- Distributed team
- Diverse organisations
 - NHS trusts
 - Universities (Bristol, Huddersfield, Hull)
 - NIHR
 - CRN
- Engagement with patients and professionals
- Social media
- Required an online environment to support Steering Group, data analysis, future PSP groups

RIC v3 – a Collaborative Research Environment

VRE Toolkits - SharePoint extensions

- Cancer Imaging for SharePoint (Oxford University)
- Collaborator Search Kit (British Library)
- Content Archiving Kit (British Library)
- Content Lifecycle Integration Framework (University of Hull)
- Document Review Workflow Kit (British Library)
- · Heterogeneous Data Centre (University of Southampton)
- LabTrove-SharePoint connector (University of Southampton)
- Literature Review Kit (British Library)
- RSS Feeds Kit (British Library)
- SharePoint Entity Manager (University of Southampton)
- SharePoint Repository Kit (University of Southampton)
- User Administration (FBA) Kit (British Library)
- X-Ray Diffraction Data Converter Kit (University of Delhi)

Templates

- Researcher and Project Templates (British Library)
- La Trobe Templates for VRE RIC with Active Directory (La Trobe University)

Related Projects

Data Management Planning & Storage for Psychology (University of Sheffield)

Customising the NIHR Portal

- Existing platform for supporting health research
- Secure
- Extensible platform (SharePoint) with most of the required features

Next Generation NIHR Portal

- HDFT group invited to test shortlisted NG platforms
 - Google+ For Business
 - Jive
- Replicated SharePoint functionality
- Additional features
 - videoconferencing
 - more of a social 'look and feel'
 - creation of multiple sites
 - engagement with external stakeholders and patients
- Enabled use of certain data analysis plug-ins

Harrogate and District NHS Foundation Trust

Experience to date - pros

- Encourages collaboration between participants
- Simplifies document sharing and version control
- Provides a central repository that all parties can add to and take from
- Helps disseminate best practice across the group (learning from each other)
- Saves time
- Ideal way to communicate with home-based participants (e.g. patients)
- Enables external partners to feel part of the group
- Quick way to find information (e.g. phone numbers, meeting dates)
- Helps reinforce links between researchers and patients

Experience to date – some cons

- Different way of working reluctance to engage
- Can duplicate effort until people get used to it
- Can seem remote tends to discourage direct contact (e.g. phone calls)
- Access is a barrier to use if it is not simple and reliable (multiple logons)
- Logon an issue from certain networks
- Not our platform modifications dependent on others
- Some features not intuitive perceived learning curve
- Local IT policy can be an issue
