

# Using free and open source software to stream live events through Facebook

[chris.rogers@lso.co.uk](mailto:chris.rogers@lso.co.uk)

## **LSO Mission Statement**

*"To make the finest music available to the greatest number of people"*

LSO

## Server Options

### Flash Media Streaming Server

<http://www.adobe.com/uk/products/flash-media-server-family.html>

### Wowza Media Server

<http://www.wowza.com>

### Red5

<http://www.red5.org>

## Red5

Builds available for Windows, Mac and Linux

Requires Java6

Documentation scant

Mastery of the command line a bonus!

Demo apps include OflaDemo which will allow live RTMP video streaming 'out of the box' and works with Flash Media Live Encoder

## **Facebook app front end**

Can be as simple as a page of HTML

Video player can be embedded

Tab option allows you to prominently place on a 'fan' page

Facebook social plugins allow audience interaction

## Online video players

### **JWPlayer**

<http://www.longtailvideo.com/players>

### **Flowplayer**

<http://flowplayer.org/>
